

TMS TENTS

**SET-UP IN LESS THAN
5 MINUTES**

- 30°C

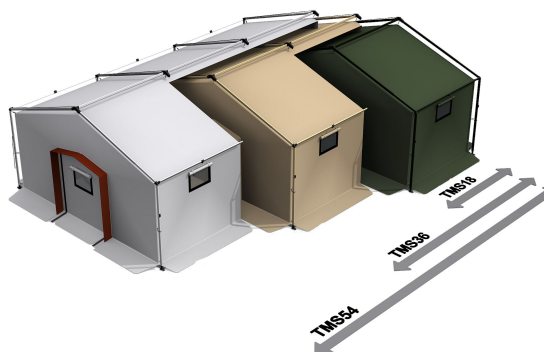

+ 70°C

Windload : 110 km/h

Snowload : 50 kg/m²

COMMERCIAL DESCRIPTION

TMS tents share the basic TM shelter concept and equips it with increased internal usable space using a variant-walled frame design. The shelter enjoys the TM shelter's zero-MHE, rapid set-up and easy principle of build.

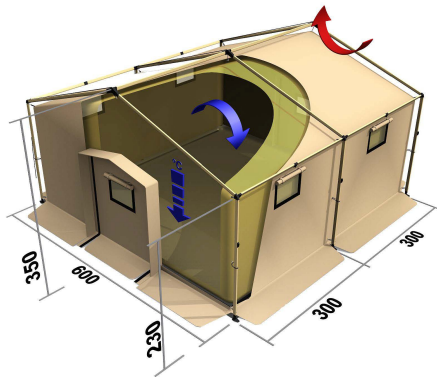

TECHNICAL DESCRIPTION

- **Standard configuration :**
 - Frame color : black
 - Main canvas color : white, NATO green, sand
 - Ground sheet color : green for green tents and grey for white or sand tents
 - Doors : 1.80 m-wide
 - Window : 80 x 60 cm with cristal and privacy shutter
 - Ground sheet fixed by velcro and straps
 - Hanging net (black)
 - Access sleeves : 350 mm diameter
 - Waterproofing flaps
 - Hanging points for inner liner, COLPRO liner, decontamination liner for 3 lines
- **Available dimensions :**
 - TMS18 : 18 m²
 - TMS36 : 36 m²
 - TMS54 : 54 m²
- **Storage :**
 - Frame and canvas are stored in transport bags.
 - These bags have 6 handles and could be moved with forklift.

Since its launch in 2013, this design has seen increasing interest amongst the military sector.

HIGH QUALITY MANUFACTURING

The TMS tents are made of resistant and quality materials.

- Bars and mechanical connecting parts made of anodised aluminium alloy covered with epoxy paint. Eyelets, toggles, hooks and screws made from hot-dip galvanized steel.
- Main canvas manufactured from 500 g/m² polyester material coated with PVC on both sides. Canvas composed of several widths assembled by high frequency electric welding.
